Indians Decline to Pay Taxes on Dogs, "Wards of State."

(Special to The Evening World.)
STONINGTON, Conn., Dec. 15.—State Policeman Howard Elliott, who is attached to the Department of Diseases of Domestic Animals, has returned from New London County, where he has been settling the trouble arising over the refusal of the Indians who live on the Eastern Reservation in that county, to pay dog licenses. The reservation consists of a square mile, and there are five families of Pequot Indians living on it. They have about ten dogs, and they claim that, being wards of the State, they are exempt from all taxation, and that the scope of their exemption takes in dog license fees.

Pheasant Propagation at Jewett City a Success.

(Special to The Evening World.)
JEWETT CITY, Conn., Dec. 15.—The Ashland Fish and Game Protective Association of Jewett City has been doing some excellent work in restocking their streams and fields with fish and game. Thirty odd ring-neck pheasants were hatched out by the Secretary of the club, A. L. Stebbins, and after caring for them for two weeks the chicks were transferred to a large pen at the home of George S. Brown, who is the President of the association. These birds were kept through the summer and twenty-five of them raised to

maturity. All the birds have been released in pairs. The pheasant venture is pronounced a success, and the association members are reckoning on good sport next year.

Butter and Eggs for instance!

OUR butter is guaranteed Extra, under the rulings of the New York Mercantile Exchange. As far as eggs are concerned, every October and November it is almost impossible to get fine, fresh eggs. The reason is the farmer hoards his August and September eggs in the old barn until he gets the high prices which prevail later. He then ships these eggs to market and calls them strictly fresh. For that reason eggs have not been 100% lately. Now we have the 100% egg, and we want you to take our word for it. The mild weather in producing sections is the reason for such fine quality and such a reasonable price.

Suggestions for Christmas Shopping

An electrical gift lasts every day in the year. Electricity in the home means cleanliness and comfort, the elimination of exhausting labor, and the solution of the servant problem.

Electrical devices take the drudgery and monotony out of home work, and lessen enormously the duration of the work-hours required to maintain the highest state of attractiveness and sanitation, leaving much additional time for leisure and other occupations and interests.

Something of the growing public interest and appreciation in electrical home appliances is indicated by the extent to which they are now exhibited and sold throughout the city.

They are also on exhibition in our various district offices and will be gladly demonstrated to anyone without the slightest obligation to make a purchase.
